

PRODUCT GUIDE

Mineral Fertilisers

Spreader Blend 2

18% Calcium+ 35% Carbon +12% Silicate + Natural Minerals.

Key Points

- Rebuilds Tired and worn soils through remineralisation
- Builds critical levels of many trace elements
- Increases soil carbon levels for energy, water and nutrient holding capacity
- Increases the ability of plants to resist pest and disease attack.
- Greater Biological activity in the soil promotes availability of both target and other tied-up nutrients in the soil

Improved Soil Health reduces input costs through efficiency.

Activated Response

Bio Carbon & Mineral Technology With Rock Phosphate successfully combined with a complex organic carbon concentrate. This blend has been delicately handled to ensure the full benefit of a nutrition catalyst to enhance ion transfer and their enhancement of cell wall permeability.

Typical Analysis (w/w)

Nitrogen	1000 ppm	Boron	2 ppm
Phosphorous	300ppm	Copper	8 ppm
Potassium	2000ppm	Zinc	20 ppm
Sulphur	400 ppm	Cobalt	4 ppm
Calcium	18%	Molybdenum	4 ppm
Magnesium	1.5%	Selenium	1 ppm
Iron	1%	Carbon	35%
Manganese	400 ppm	Silicates	12%

Product Specifications

Form:	powder	Energy	500- 900 p.mag

Application Guide

Application Rates should be determined by soil analysis and applied in conjunction with a balanced nutrition program. The following rates are generalized for irrigated and dry land cropping, for intense horticulture these rates can be increased. Contact a Safe Fertilisers Qualified Consultant for assistance

Spreader Blend 2 is best applied broadcast with a belt spreader only.

Maintenance: 100-250 Kg/Ha

Soil Building: 250-400 Kg/Ha

Horticulture: 250-650 Kg/Ha

Compatibility: Check with Safe Fertiliser Qualified Consultant prior to blending this product with other fertiliser

Note; This Blend can be used to uniquely formulate a fertiliser to suit a specific need in any crop

Spreader blend 2; Natural Minerals, Rock Phosphate, Dolomite, Organically blended together. This unique balance of natural minerals sourced from the bowels of the earth ensures that the soils nutrient bank is complete for vibrant growth of crops.
