# Animal Feed

**Supplements** 

# **Animal Minerals**

0.5% Nitrogen + 1.5% Phosphorous +0.3% Potassium + 1.5% Sulphur + +5.3% Calcium + 4.1% Carbon + Natural Minerals.

### **Key Points:**

- Rebuilds Tired feed rations through remineralisation
- Builds critical levels of many trace elements
- Increases feed carbon levels for energy, water and nutrient holding capacity

PRODUCT

GUIDE

ALROC

- Increases the ability of Animals to resist pest and disease attack.
- Greater Microbe activity in the gut promotes availability of both Minerals and Proteins as nutrients to the animal

Improved Animal Health reduces input costs through efficiency.

#### **Activated Response**

Natural Colloidal Minerals and Protein successfully combined with a complex organic carbon based mineral. This blend has been delicately handled to ensure the full benefit of a boost to metabolism of high performance ruminants and horses, in a safe naturally occurring manner

## Typical Analysis (w/w)

Nitrogen	0.5%	Boron	2360 ppm
Phosphorous	1.5%	Copper	20 ppm
Potassium	3787ppm	Zinc	52 ppm
Sulphur	1.5%	Cobalt	12 ppm
Calcium	5.3%	Molybdenum	10 ppm
Magnesium	2.6%	Selenium	5 ppm
Iron	1.81%	Carbon	4.1%
Manganese	344 ppm	Silicates	8%

### **Application Guide**

Mineral requirements for a balanced diet should be determined by economical, accurate and efficient hair mineral analysis. Contact a Safe Fertilisers Qualified Consultant for assistance

Animal Minerals is designed for at lib feeding, animals will only consume what they require. One or two licks is enough and animals move on to pasture. Wind vane feeders are ideal, with open troughs being also ok. Weather does not damage minerals, after rain animals will lick the crust and resume feeding. The following rates are general for ruminants, always follow the advice of your vet, and follow your sales consultant's advice on application methods and compatibility with feed rations

Cattle: 10-50 g/Head/day

Sheep: 5-25 g/Head/day

Goats: 5-25 g/Head/day

**Compatibility:** Check with Safe Fertilisers Qualified Consultant prior to blending this product with other feeds.

**Note;** This Blend can be used to uniquely formulate a ration to suit a specific need in any animal.

**Animal Minerals**: Natural colloidal minerals of basalt, granite, dolomite and bentonite, organically blended together with carbohydrates and copra meal. This unique balance of natural minerals sourced from the bowels of the earth ensures that the animals' nutrient bank is complete for growth, milk and meat production.
