PRODUCT GUIDE

Mineral Fertilisers

ALROC SAFE FERTILISERS

Granular Gypsum & Greens Grade

22% Calcium + 18% Sulphur

Key Points

- Rebuilds Tired and worn soils through remineralisation
- Builds critical levels of many trace elements
- Increases soil carbon levels for energy, water and nutrient holding capacity
- Increases the ability of plants to resist pest and disease attack.
- Greater Biological activity in the soil promotes availability of both target and other tied-up nutrients in the soil
  Improved Soil Health reduces input costs through efficiency.

Greens Grade

1-2 mm prill Technology, for successful application to groomed surfaces, and specialised spreading requirements. This blend has been delicately handled to ensure the full benefit of a nutritional balance and to enhance ion transfer and the enhancement of cell wall permeability.

Typical Analysis (w/w)

Nitrogen	-	Boron	-
Phosphorous	-	Copper	-
Potassium	-	Zinc	-
Sulphur	18%	Cobalt	-
Calcium	22%	Molybdenum	-
Magnesium		Selenium	-
Iron	-	Carbon	-
Manganese	-	Silicates	0.15%

Product Specifications

Form:	granule	Energy	300- 700 p.mag

Manufactured by SAFE Fertilisers Pty Ltd Lot 66 Chum Rd Dinmore Q 4303 • Ph (07) 3282 0801 • Fax (07) 3282 0501 • www.safefertilisers.com.au

PRODUCT GUIDE

Mineral Fertilisers

Application Guide

Application Rates should be determined by soil analysis and applied in conjunction with a balanced nutrition program. The following rates are generalized for irrigated and dry land cropping, for intense horticulture these rates can be increased. Contact a Safe Fertilisers Qualified Consultant for assistance

Granular Gypsum is best applied broadcast or Direct Drill (Warning, it can be abrasive with air seeder application), Horticultural Spinner Spreaders and small walk behind Applicators.

Maintenance: 100-1000 Kg/Ha

Soil Building: 500-1500 Kg/Ha

Horticulture: 250-2000 Kg/Ha

Compatibility: Check with Safe fertiliser Qualified Consultant prior to blending this product with other fertiliser
Note; This Blend can be used to uniquely formulate a fertiliser to suit a specific need in any crop

Granular Gypsum; Gypsum organically granulated and prilled for ease of application. This process of manufacture reduces the amount of fines that may escape during the spreading form of application. This unique balance of natural minerals sourced from the bowels of the earth ensures that the soils nutrient bank is complete for vibrant growth of crops.
