SAFE
FERTILISERS

Vital P Blast

19% Nitrogen 13% Phosphorous + Fulvic Acid

Key Points

- Added Fulvic assists the Phosphorous and Nitrogen in plant availability
- Reduced waste and loss from leaching and volatilisation
- Phosphorous and Nitrogen available without hindering plant uptake.
- High analysis phosphate source
- Suitable for foliar and soil applications

Improved Plant Health reduces input costs through efficiency.

Vital Response

This Blast of liquid nutrition gives plants the benefit of available nutrient. Phosphorous and Nitrogen is needed by all cells for growth. Vital P Blast is giving plants the essential building blocks of plant structure; however, it is essential that Phosphorous and Nitrogen are in balance with all other elements.

Typical Analysis (w/v)

Nitrogen	19%	Boron	
Phosphorous	13%	Copper	
Potassium	0	Zinc	
Sulphur	0	Cobalt	
Calcium	0	Molybdenum	
Magnesium	0	Selenium	
Iron	0	Carbon - Fulvic	0.20%
Manganese	0	Silicates	

Product Specifications

Form: Liquid Energy

PRODUCT GUIDE

Vital Nutrition

Application Guide

Application Rates should be determined by a Soil and leaf analysis and applied in conjunction with a balanced nutrition program. The following rates are generalized, for intense horticulture these rates could possibly be increased. Avoid very hot conditions. Best applied 5-25°C. Contact a Safe Fertilisers Qualified Consultant for assistance

P Blast is best applied direct onto the soil or growing leaves of the plant by Boom Spray application, Irrigation Lines or Horticultural spray applicators, all are ok.

Rate: 5-15 lt/Ha in 100lt water, Boom spray, Aerial or overhead Irrigation

Stressed 10-15 lt/Ha in 200lt water Hand Spray or Boom spray application

Horticulture Fertigation: 10-20 lt/Ha.... From seedling to vegetative stage

Compatibility: Check with a Safe Fertiliser Consultant prior to blending this product with other liquid fertilisers

Safety; Avoid contact with skin and eyes. Wash or shower after use. If swallowed seek medical advice.

Vital P Blast; is a quickly absorbed and established source of Phosphorous and Nitrogen to promote growth. Regular application of Phosphorous and Nitrogen in low doses will ensure efficient uptake without leaching. The added benefit of Fulvic acid and a base of long chain organic plant stimulants not only give energy but nutrient holding capacity.
