

# Safe Fertilisers – Crop Info

## Pasture Program

**Seed Coating;** Vital Phos @ 4lt/tonne of seed with sufficient water to ensure adequate coating of the seed.

### **Ground preparation:**

Apply; 1 tonne/ha Lime **or** Liquid Lime @ 20lt/ha in 300lt/water

### **Pre Plant**

Apply 50 Kg/Ha Safe Coated Urea

Apply 10lt/ha Vital Activator, Boomspray with 200lt/ha water

### At Planting

**Option 1;** Apply 75 Kg/Ha DAP Supablend

With 5lt/ha Vital Phos in 200lt water Boomsprayed onto soil before planting

**Option 2;** Apply 200kg/ha CBM

With 5lt/ha Vital Phos in 200lt water Boomsprayed onto soil before planting

### Pasture Top dressing:

**Use;** 100kg/ha DAP Supablend, spread over the top by spinner or aerial application

**Or;** 150kg/ha Alroc Extra Phos & Potash spread on,

**Or** 250 kg /ha Alroc No 1 spread on

**Or** foliar spray 10lt /ha Vital Mix in 100lt water

### **Multi Nutrients:**

4Lt/Ha Vital K Blast to finish the crop off

This can be folia sprayed, aerial applied or put through an irrigation system.

### **Dry Grass Management after slashing**

Vital Activator @ 10lt/ha in 200lt of water

### **General Notice**

Safe Fertilisers highly recommend soil testing regime to commence at this stage. Subsequent soil fertility program should be formulated with Safe Fertiliser representative.

The above mentioned application rates can be adjusted to what is economical. These adjustments may not provide the ideal nutrient ratios but should replace some of the nutrients that are removed by the crop.

### **Neville Janke**

Horticulturist/ Agronomist

### Disclaimer

The above program will be affected by soil variation, testing errors, seasonal factors and management skills. Any recommendation should be acted upon as part of an ongoing fertiliser program. No responsibility can be accepted for any of the above matters or other matters that are beyond our control.
